

MMO RPG Game UI Kit

Help file

There this a big .PSD files in your package, that contains all the UI elements. It can be edited via Adobe Photoshop CC or a higher version of this program.

This file, **mmorpgUI.psd**, includes premade UI elements, grouped in specific folders:

- inventory
- userinfo
- quests
- system menu
- spells_panel
- dialog_window
- minimap
- user_plate
- hint
- chat

Such elements, like buttons, scrollbars, have different states: regular, mouseover (hover), mouseclick(press) and disabled (some of them). You can find those elements in appropriate folders, each first element is layered and can be edited easily. It can be recolored as well.

Fonts, used in the files:

- Verdana (standard font for Windows users. Also can be found here: <http://www.fontpalace.com/font-download/Verdana/>)
- Trajan Pro (<http://fontsgeek.com/fonts/Trajan-Pro-Regular> or here <http://www.fontpalace.com/font-download/TrajanPro-Regular/>)
- Trajan-Pro-Bold (<http://www.fontpalace.com/font-download/TrajanPro-Bold/>)
